What is claimed is:

CLAIMS

- 1. A plant comprising a recombinant transgene capable of expressing a kinase domain of a mitogen-activated protein kinase kinase kinase (MAPKKK) or a kinase domain thereof, wherein said transgene is expressed in said plant under the control of a promoter that is functional in a plant cell.
- 2. The plant of claim 1, wherein said transgene comprises a kinase domain which is obtained from a fungus.
- 3. The plant of claim 1, wherein said transgene comprises a kinase domain which is obtained from an animal.
- 4. The plant of claim 1, wherein said transgene comprises a kinase domain which is obtained from a plant.
- 5. The plant of claim 1, wherein said transgene consists essentially of said kinase domain.
 - 6. The plant of claim 1, wherein said plant is a dicot.
 - 7. The plant of claim 1, wherein said plant is a monocot.
 - 8. A seed from a plant of claim 1.
 - 9. A cell from a plant of claim 1.
- 10. A vector comprising a promoter functional in plant cells operably linked to a gene encoding a MAPKKK polypeptide or kinase domain thereof.

- 12. The vector of claim 10, wherein said vector comprises a gene encoding MAPKKK kinase domain.
- 13. The vector of claim 11, wherein said kinase domain is obtained from a plant MAPKKK.
 - 14. A cell comprising the vector of claim 10.
 - 15. The cell of claim 14, wherein said cell is a plant cell.
